Marvel Comics Marketplace

Marvel Comics API, Javascript, HTML5, CSS, jQuery, PostgreSQL, Amazon web services, Express, HandleBars, Node.js

Marvel Comics MarketPlace is a application where Marvel fans can come together to buy, share, trade or sell their favorite comics from their collections. We have developed a comprehensive catalog of over 40,000 digital comics for our users to view or share with their friends. We designed the application for users to search efficiently for your favorite comic or just browsing for a new one to add to your collection. We have comics for all of our users and invite you to use our free app for all your comic book interests.

The Mound

SportsRadar API, Javascript, HTML5, CSS, jQuery

We created the Mound for the fans. Stay up to date on your favorite team's players, stats, schedules and all things baseball. Whether you're a casual fan or a season ticket holder we have the perfect site for your baseball fix.
